Building a campfire should always be done in an established campfire ring, but we can always practice at home. Check out how to build a campfire while enjoying a delicious treat.

Steps:

1. Lay out your safety circle. Check to make sure it is free of trash, leaves and sticks.
2. Make your first ring inside your safety circle. The fire ring is very important because it stops the first from spreading.
3. Check to make sure you have a rake and a bucket of water nearby.
4. Make an A or a V frame of logs.
5. Make a teepee of tinder in the center of your logs.
6. Add kindling on top of the pile. Be sure to leave room for air flow.
7. Add logs.
8. Light the tinder with a match to start your fire.
