Window clings are a great way to decorate your windows and share some bright and colorful images! They are often used to celebrate the seasons and holidays. What can you design to celebrate the spring and summer?

**What you need:**
- 1 bottle of liquid white glue
- Dish soap
- Food coloring (gel or liquid)
- Plastic page protectors or freezer paper
- Paint brushes
- Cookie cutters (optional)

**Steps:**
1. Decide your design. Draw it on a piece of paper and slide it into the page protector, or place under the freezer paper.
2. Mix two tablespoons of glue, two drops of dish soap and one drop of food coloring together. You can mix this with the paint brush.
3. Use a paintbrush to paint your design. You want to be sure to have a good layer of color, but don’t make it too thick or it won’t dry. If you are using a cookie cutter, brush the mix into the cutter.
4. Let the designs dry on the plastic sheet protectors. It will take a few hours, depending on how thick the coat was.
5. When they are dry, peel them off of the sheet and stick them on the window. Send us a photo so we can see your project! #GSCBatHome

**Pro Tips:**
- If you are using freezer paper, make sure it’s entirely flat or your mix may run and blend together.
- You can outline your design with puffy paint to create a shape to paint in and give it a stained glass look!
